

University Internships – Function development/modelling and simulation (Celle, Germany) 2024 opportunities

The Baker Hughes Internship is designed to enable students pursuing a Bachelors' or Masters' degree to gain hands-on work experience as the foundation of their professional lives. Our internships will give you first-hand insights into the processes, systems, and practices that are aligned to ensure customer needs are met through flawless execution and the application of leading-edge technology.

The internship is intended to enable Bachelor's or Master's students to gain practical work experience as a basis for their professional life and, depending on their performance, can be the starting point for a further career. The duration should be 3-6 months.

We are regularly looking for students for Celle office in the fields of

- Electrical engineering,
- Mechanical engineering
- Mechatronics
- Computer science
- Data science
- Systems engineering

To be successful in this role you will:

- Be currently enrolled in a Bachelors' or Masters' level degree in above-mentioned areas,
- Knowledge of digital signal processing, control engineering or data analytics
- Programming experience
- Knowledge of Matlab/Simulink
- Technical understanding, analytical thinking, willingness to learn, interpersonal skills
- Ability to work in a team and under pressure
- The language of communication can be German or preferably English.
- EU work permit.

People first, energy forward
